The risk assessment should be shared and discussed with all the leaders of the visit, and should only be approved once all significant hazards have been identified, the control measures are agreed, AND the overall level of risk has been reduced so far as is reasonably practicable and acceptable, taking also into account the likely benefits. If the overall risk level is considered unacceptable, additional precautions/control measures will need to be introduced. Any visit involving “high risk activities and environments” should be recorded as a Category “A” visit on ROVER and submitted for approval to the LA, as well as to internal managers. If in doubt, group leaders are advised to seek advice and guidance from the LA Educational Visits Consultant.
